Adjusting ScanVision sEMG Settings

This article will show you how to adjust the button sensitivity on your sEMG ScanVision scanners.

1. Open the Setup menu, go down to Settings, and select Devices.

🍘 MyoVision (tm)		
File View Patient Exam Protoco	Setup Help	
A ⊘ r _⊂	Doctor Information	
Print Open Close Backu	Database uick Training	
	Calibrate	
	Settings General	
	Reports Devices	
	Language Pair Device \ Check Status	η
	VisionPort	

2. Select the ScanVision option on the left.

Preferences	x
System HUB Setting ScanVision UpnaVision FlexVision	System HUB Settings Connected HUB Information: VisionHUB Version: 0.00 Physio Monitor Version: NA System HUB Information System HUB Information

3. When the ScanVision options appear they will allow you to adjust the button sensitivity. Here you will be able to adjust how long the devices stay on before automatically turning off, the button sensitivity and how long the devices settle for.
