## Change the Static Scan Graph Colors

Last Modified on 07/09/2018 3:17 pm PDT

## <u>Summary</u>

This article will show you how to change the static back graph shade from lighter, darker, and grayscale.

1. To adjust the setting, first open the MyoVision software. Once opened, from the menu select **Setup**, **Settings**, and then **Static** from the menu tree.

🝘 MyoVision (tm)									
File	View	Patient	Exam	Protocol	Setup Help			_	
	1	ъû	$\bigcirc$	<u>ک</u>		Doctor Information			\$
Prin	ר וt	Open	Close	Backup		Database		uick	r Training
						Calibrate			
					Settings		•		General
						Reports	►		Devices
						Language			Pair Device \ Check Status
									VisionPort
									Static
									Dynamic

2. The static settings allow you to change the bar color for different reading levels. You can also choose what you want to display on the graph such as percent, goal, site labels, etc. You can also change the shade of the back graph image as shown below.

Static Settings			x
Bar Options: Very Low Low Moderate High	Goal Imbalance: MWA 5	<ul> <li>Percent</li> <li>Show Goal</li> <li>3D Bars</li> <li>Show Site Labels</li> <li>Show μV</li> <li>Hide Bar Pointer Tip</li> <li>Extended Narrative Report</li> <li>Moving Bar Maximizer</li> </ul>	OK Preview Default Colors Cancel
