Customizing the EScan Message

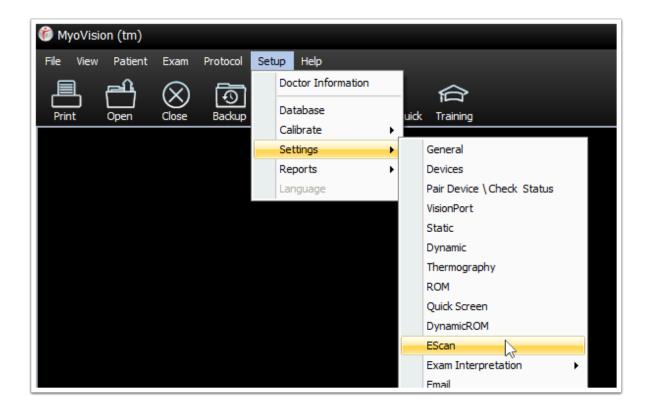

This article will guide you through the steps to customize your E-Scan message.

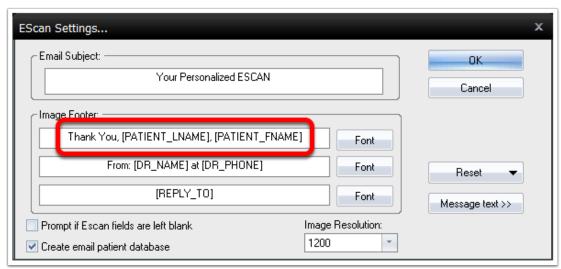

Click on the instructions inside the tabbed menu:

Add the Patient's Name to the EScan Message

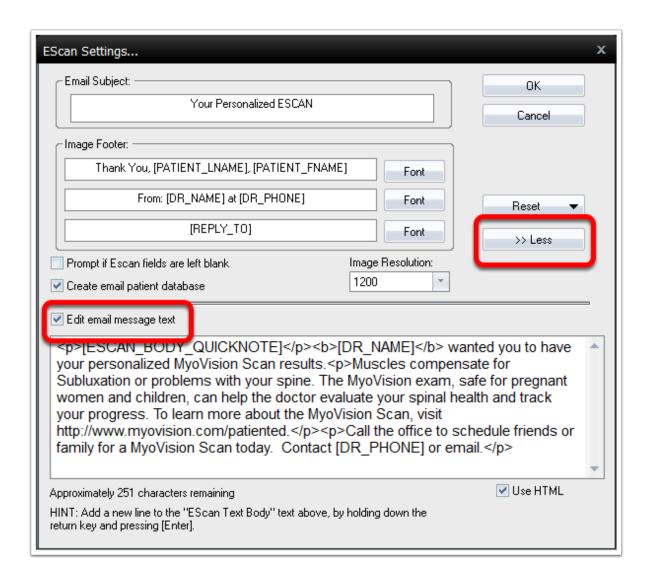

1. Inside the MyoVision software, click **Setup** in the menu, go to **Settings**, then **EScan**.

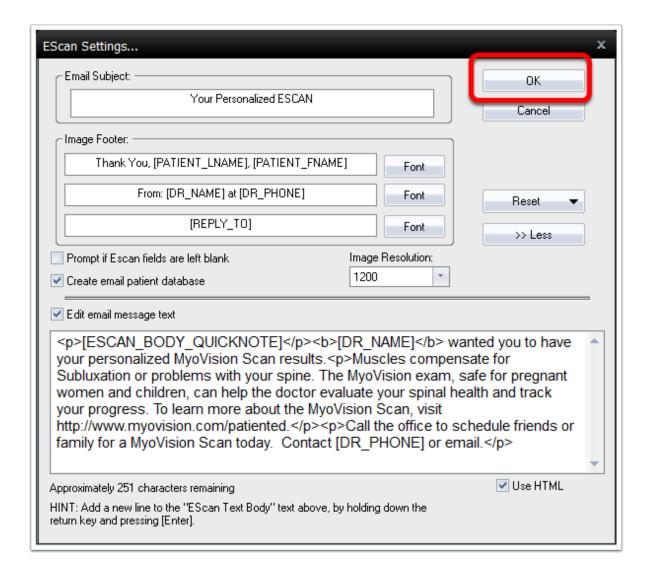

- 2. The EScan Settings window will open, allowing you to customize 1) the display text on the scan image and 2) the text of the email that accompanies the Scan.
 - Edit Image Footer: To add the patient's first name, type: [PATIENT_FNAME] where you want the patient's first name to appear. To add the patient's last name, type: [PATIENT_LNAME] where you want the patient's last name to appear.

3. To edit the text that accompanies the scan: Click the Message text button. Check the checkbox for "Edit email message text" to enable editing.

4. When you've finished making changes, click the **OK** button.

Restore to Default Settings

If you need to reset the message back to default settings:

- Click on Reset
- Click "Yes" to the prompt
- Select if you want to reset Fonts, Text, or Fonts and Text
- Click "Yes"
