How to Delete a Patient Profile

Last Modified on 09/29/2020 2:35 pm PDT

<u>Summary</u>

This document shows you how to delete a single patient profile and all associated exams in the MyoVision software.

Before you Begin

- 1. Open MyoVision Software
- 2. WARNING: Once you delete a patient profile it cannot be undone and the data cannot be restored. Consider backing up your database before deleting the patient profile and their exams.
 - Not sure how to backup your database? Check out this support article: Backup and Restore a Patient Database
- 3. Make sure you have the latest version of the MyoVision software. Download here:
 - https://www.myovision.com/download.html
 - How Do I Check My Software Version?
 - Updating Your MyoVision Software

How to Delete an Exam

1. Open the Patient menu, then click Delete

🍘 MyoVisio	n (tm)					
File View	Patient Exam	Protocol	Setup H	lelp		
Print	Edit Delete	Backup	(i) Scan	0 N-Scope	5/F5 Quick	rraining

)elete multiple pa	tient records:	Hold down	<ctrl> key, select the examp</ctrl>	u want to delete and click the	Delete

3. Click Confirm to delete the patient.

<u>NOTE</u>: You can not delete an empty patient profile!!! If you have an empty patient profile that needs deleting you will have to move an exam into it first. Try creating a "dummy" exam in a non-empty patient profile then move it to the empty profile.

Not sure how to move an exam? See our support article How to Move an Exam
