

How to Take Screenshots for Interpretation Reports

Last Modified on 07/01/2019 11:31 am PDT

Table of Contents:

- [Summary](#)
 - [Install and Setup](#)
 - [Create Report and Import Images](#)
-

Summary:

This article will show you how to import screenshots of a DynaROM exam into the interpretation report.

Install and Setup:

In the first set steps we will be downloading the Greenshot software and set it up to be used for capturing images for your interpretation reports.

Install Software

Setup
Preferences

Create Report and Import Images

Now that Greenshot has been installed and setup you are ready to create your report and begin importing images.
