Change the Primary Language Settings

Last Modified on 04/19/2018 9:09 am PDT

This article will guide you through changing the language setting in the MyoVision software

1. Setup > Settings > General

Go to Setup, Settings, and select General from the menu

2. Advanced

On the General Setup window, select the Advanced button.

General Setup	x
 Show training prompt on startup Remember last patient Show add/replace exam prompt Chack for and use interact convises if available 	OK Cancel
 Confirm successful hub connection on startup Load libraries on program startup Show enhanced Patient Exam information Mute MuoVision Software sounds 	<< Advanced

3. Enhanced GUI

Remove the check mark next to Enhanced GUI and then click OK

General Setup		×
 Show training prompt on sta Remember last patient Show add/replace exam pro Check for and use internet s Confirm successful hub cont Load libraries on program sta Show enhanced Patient Exa Mute MvoVision Software so 	rtup ompt services if available nection on startup artup im information unds	2 OK Cancel >> Less
Video Path Path C:\WinScan98\Trai Exam Goal Display Time Enable Seconds: 5 RESET Primary user Info.	ning2 Enhanced GUI Measure Mode (USA) Use Manual Pair / Bind Force Check Device Status Patient ID Required Debug	Previous Exam History: Size: 3 Use SQL remote data Show Report Disclaimer Automatic Daily Backup Hide Legacy Protocols Disable VisionPort 2 Save Performed Exams Locally

4. Restart

You will then be prompted to restart the MyoVision software. Click OK and then close and reopen the software.

5. Setup > Language

Once the software has been opened, go to Setup and then Language and select your desired language.

🍘 MyoVisio	n (tm)						
File View	Patient E	xam Proto	col Se	tup Help			
a .		▶ 🛄 🖡	F	Doctor Information		1	🗲 🛛 🖉 🔚 🕷
